Experiment -1

AIM: To create an AWS free tier account to provision the resources.

Description:

Amazon Web Services (AWS) is a cloud computing platform that provides services such as computing, storage, databases, networking, and security over the internet.

An AWS Free Tier account allows beginners and students to explore AWS services and learn how to create and manage cloud resources.

Steps:

1. Open Google Chrome.
2. Visit the official AWS website: AWS Free Tier.
3. Click on Create a free account.
4. Enter your email ID and AWS account name.
5. Verify your email using the OTP sent by AWS.
6. Create a strong password for your account.
7. Enter your personal and contact details.
8. Complete the identity verification process.
9. Complete payment verification if requested.
10. Select the Free account plan.
11. Complete the registration process.
12. Open the AWS Management Console.
13. Explore the available AWS services.
14. Search for services such as:
    - Amazon EC2 – To create virtual machines.
    - Amazon S3 – To store files and objects.
    - Amazon RDS – To manage databases.
    - IAM – To manage users and permissions.
15. Check the AWS Free Tier dashboard to view available credits and usage.

Output:

AWS Free Tier account was created successfully, and the AWS Management Console was accessed to explore cloud services such as EC2, S3, and IAM.
